

My favourite **AI** skills today

Guide written by Nas
Selling with Nas

Claude AI Skills can really supercharge the way you work, from automating your SEO, to building full videos with a prompt. Below I'm sharing a quick guide on how to install a skill, as well as 20 of my favourite skills so you can start using them.

How to download a skill

There are a few ways to download a Claude skill depending on what interface you're using, but for the matter of simplicity, I will share below how to set up a skill on the Claude Desktop App:

- 1) Open the Github Link with the skill.MD file
- 2) Click on the button on the top right that says "Download Raw File". This will download the skill.MD file.
- 3) Go to your Claude desktop app
- 4) Click on Customize > Skills > hit the "+" icon > Create Skill > Upload Skill
- 5) Upload the skill.MD file you downloaded

Are you a more visual person?

If you want to see a video guide on Youtube of how to download skills and how to best use them, you can find it here:

If you want to go deeper into AI and learn about workflow automation, AI Agents and more...

[Join My Masterclass](#)

Claude Skill 1: Frontend Design - Stops Claude from generating generic "AI slop" UIs by forcing a bold aesthetic direction before writing a single line of code.

[Download here](#)

Claude Skill 2: Superpowers - Turns Claude into a disciplined senior developer by enforcing a 7-phase workflow: brainstorm → spec → plan → TDD → build → review → finalize

Claude Skill 3: Context7 - Pulls live, up-to-date library docs into Claude's context automatically so it never gives you answers based on outdated API versions.

[Download here](#)

Claude Skill 4: Remotion - Teaches Claude every Remotion-specific pattern - animations, audio, captions, 3D, timing - so it generates production-ready video with a simple prompt.

[Download here](#)

Claude Skill 5: Caveman - Cuts Claude's output tokens by 65% by stripping all filler and narration while keeping every technical detail and code block intact.

[Download here](#)

Claude Skill 6: Supermemory - Gives Claude persistent memory across sessions - it remembers what you worked on, your preferences, and your project context so you never start from scratch.

[Download here](#)

Claude Skill 7: Agent Browser - Lets Claude control any website through clicks, form fills, and screenshots so your AI agents can interact with tools that have no API.

Limited Spots Available

Claude Skill 8: File & Document Processing - Gives Claude direct access to PDFs, spreadsheets, and CSVs to parse, clean, and convert them into pipeline-ready data automatically.

[Download here](#)

Claude Skill 9: Code Reviewer - Runs three parallel review agents on your code simultaneously, checking reuse, quality, and efficiency, then aggregates and applies fixes automatically.

[Download here](#)

Claude Skill 10: Git Commit Writer - Reads your staged diff and writes a precise conventional commit message - right type, right scope, breaking change detection included.

[Download here](#)

Claude Skill 11: README Generator - Scans your actual project structure and dependencies to generate a complete README with installation, usage, and configuration sections - no boilerplate, no guessing.

[Download here](#)

Claude Skill 12: Changelog Generator - Reads your commit history and turns it into clean, user-facing release notes grouped by feature, fix, and breaking change — automatically, before every release.

[Download here](#)

Claude Skill 13: Vercel UI Guidelines - Audits your UI code against 100+ rules covering accessibility, performance, ARIA attributes, touch targets, and semantic HTML - a linter for everything ESLint misses.

[Download here](#)

Claude Skill 14: Env Doctor - Diagnoses why your project won't start by systematically checking runtime versions, missing dependencies, environment variables, and port conflicts in seconds.

[Download here](#)

Claude Skill 15: Taste Skill - A 3-dial design system (variance, motion, density) that lets you tune exactly how bold, animated, and dense Claude's UI output should be - like an equalizer for AI design.

[Download here](#)

Claude Skill 16: UI-UX-Pro-Max - Auto-selects a colour palette, font pairing, and component style based on your industry from a library of 161 palettes and 57 font pairings across 12 tech stacks.

[Download here](#)

Claude Skill 17: Artifacts Builder Rapidly prototypes interactive React + Tailwind + shadcn/ui components from plain English descriptions - from idea to working UI in minutes.

[Download here](#)

Claude Skill 18: Claude SEO - Runs full-stack SEO audits with live data, as keyword gaps, on-page issues, technical problems, and competitor positioning, etc. then outputs a prioritised action plan.

[Download here](#)

Claude Skill 19: Marketing Skills Pack - Packages campaign planning, content creation, email sequences, brand voice, and performance reporting as repeatable professional workflows.
